Let's Start!

Resolving conflicts peacefully is important!

Learning Outcome

Describe problems in social contexts.

Ask your partner:

- Why do humans have physical altercations or fights?
- Why do humans argue?
- What are some other ways of resolving conflicts?

Can Do Statements

- I can discuss coincidences, strange events or superstitions.
- I can talk about my attitudes toward an action.
- I can talk about cause and effect, and hypothetical situations.

Let's Explore!

Why do animals of the same **species*** fight?

* The word "*species*" means one of the basic units of biological classification, like reptiles.

Instructions: Read the text aloud.

If you happened to see two wild animals fighting, you would know it's an impressive sight. You may even have considered asking why animals of the same species fight. It seems illogical.

All male animals fight among themselves. Young males fight to practice fighting. It also helps them to recognize their kin, evaluate risk and cope with stressful situations.

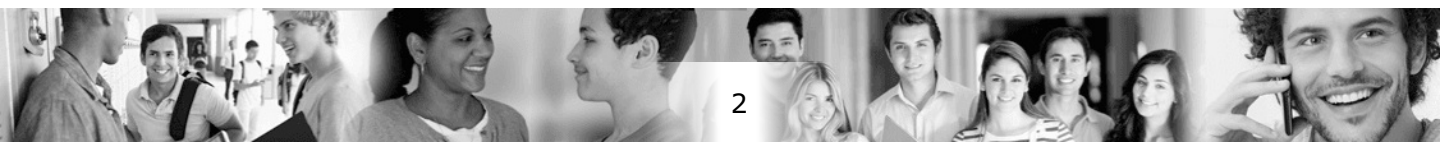

Adult males dislike having competition, so they challenge other males to fight for territory. If they do this, they are also sure there is enough food for the herd. Newcomers cannot expect to stay and eat.

If the male is the strongest, he will be able to mate. If his females have offspring, they will be strong, healthy, and have a chance of surviving.

If you've seen dogs fighting, you have noticed that the loser is not seriously hurt. Animals only want to establish a hierarchy. Fights tend to be more like games than battles. If a male loses he's probably young. He lacks strength and experience. He'll try to win again when he is older.

For thousands of years the stronger, more aggressive animals have survived, while the less aggressive have died out. So, if you spend time observing animals, you'll realize that fighting is the key to survival.

There are important lessons to be learned from the animal world. Males of the same species fight, but none are killed. If men behaved like animals, life among humans would be very different!

Let's Practice!

Let's talk about animal fighting!

Instructions: Read the sentences below and circle the incorrect words.

- 1) Male animals has always fight for territory.
- 2) This is how they recognizing their kin.
- 3) They've disliking having competition.
- 4) These animals of the same species fighting to establish a hierarchy.
- 5) Fighting have are the key to survival.
- 6) Newcomers could not expected to stay and eat.

Let's Practice!

Animals love to fight!

Instructions: Read the sentences aloud. Check your pronunciation with your instructor.

1. Males always want to establish a hyerarchy.
2. Fights tend to be more like games than battles.
3. The young male tries to win it when he's older.
4. You may never have considered asking why animals of the same species fight.
5. Adult males dislike having competition.

Extension Activity

Find out about a wild animal in your country.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online or to a library to watch a nature program about a wild animal that lives in your country.
- Take notes on where it lives, what it eats and how many offspring are expected.
- Find out how they 'fight' together and how they establish a hierarchy.
- Use your notes to write 150 words about the animal.
- Use *if* clauses in your written piece.
- Share your writing with a partner.

Self-Assessment

Yes

No

I find out about a wild animal that lives in my country.

☐ ☐

I take notes on the animal.

☐ ☐

I write 150 words summarizing my findings.

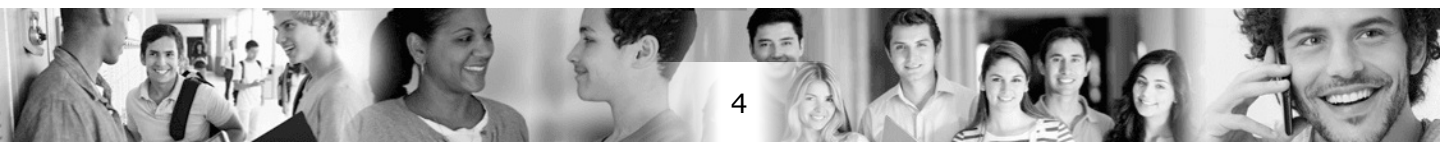

☐ ☐

I share my writing with a partner.

☐ ☐

Target Words

- to die out** (verb): to cease to live
e.g. More aggressive animals have survived, while the less aggressive have died out.
- illogical** (adjective): irrational
e.g. It seems illogical.
- kin** (noun): of the same family
e.g. It also helps them to recognize their kin, evaluate risk and cope with stressful situations.
- risk** (noun): a dangerous chance
e.g. It also helps them to recognize their kin, evaluate risk and cope with stressful situations.
- to cope** (verb): to struggle or deal with something
e.g. It also helps them to recognize their kin, evaluate risk and cope with stressful situations.
- territory** (noun): an area of land
e.g. Adult males dislike having competition, so they challenge other males to fight for territory.
- newcomer** (noun): a person or thing that has recently arrived
e.g. Newcomers cannot expect to stay and eat.
- hierarchy** (noun): any system of persons, animals or things ranked one above another
e.g. Animals only want to establish a hierarchy.
- to tend** (verb): to have a tendency toward a particular quality
e.g. Fights tend to be more like games than battles.

Learning Points

Gerunds and Infinitives

A **gerund** is a verb ending with -ing (doing).

An **infinitive** is to + verb (to do).

There are some verbs that can only be followed by a gerund:

consider (doing)

practice (doing)

dislike (doing)

spend time (doing)

Example:

Adult males **dislike having** competition.

There are some verbs that can only be followed by an infinitive:

happen (to do)

help (to do)

want (to do)

try (to do)

Example:

Fights **tend to be** more like games than battles.

There are some verbs that can be followed by an object plus an infinitive:

Examples:

They **challenge** other males **to fight** for territory.

It also **helps** them **to recognize** their kin.

Examples:

- If you **happened to** see two wild animals fighting, you would know it's an impressive sight.
- Animals only **want to** establish a hierarchy.
- He'll **try to** win again when he is older.
- You may even have **considered asking** why animals of the same species fight.
- All male animals, fight among themselves. Young males fight to **practice fighting**.

Learning Points

The First Conditional versus The Second Conditional

You use the first conditional to talk about real situations in the present or future.

You use the second conditional to talk about unreal or imaginary (hypothetical) situations in the future.

First conditional form:

If + Simple Present verb, + will

If you come over, I'll help you with that.

(you can come over)

Second conditional form:

If + Simple Past verb, + would

If you had time, I would help you with that.

(I don't think or I know you don't have time)

First Conditional (Cause and Effect)	Second Conditional (Hypothetical Situations)
<i>If they do this, they are also sure there is enough food for the herd.</i>	<i>If you happened to see two wild animals fighting, you would know it's an impressive sight.</i>
<i>If the male is the strongest, he will be able to mate.</i>	<i>If you spent time observing animals, you'd realize that fighting is the key to survival.</i>
<i>If his females have offspring, they will be strong, healthy, and have a chance of surviving.</i>	<i>If men behaved like animals, life among humans would be very different!</i>

Remember to use a comma (,) after the IF clause.

In conversation, it is common to use contractions. (I would = I'd).
